CF ARCHITECTURAL/ HORIZONTAL WALL PANEL

The Metl-Span III CF Architectural/Horizontal wall panel is ideal for high profile horizontal applications. Designed to install with concealed clips and fasteners in the side joint, CF Architectural/Horizontal wall panels provide maximum design flexibility and a beautiful high-tech appearance. The horizontal interlocking joint can be varied for visual impact. It may be ordered flush or with a 3/8" deep reveal of 1/4", 1/2", 3/4", 1", 1-1/2", 2", 2-1/2" or 3" width. The panel ends are folded to eliminate the need for metal trim at the vertical butt joint. The joint is sealed with a black dry gasket to create a shadowline effect that can be emulated in the horizontal reveal.

CF ARCHITECTURAL/HORIZONTAL WALL PANEL FEATURES

- Exterior Profile:** Architectural flat with flush or reveal horizontal joints.
- Interior Profile:** Light Mesa Wave pattern, 1/16" deep.
- Foam Core:** Foamed-in-place, Blister-Free, Non-CFC polyurethane, Factory Mutual Class I approval
- Module Widths:** 24", 30", 36"
