

CF FLUTED WALL PANEL

The ribbed profile of the Metl-Span III CF Fluted wall panel provides bold vertical lines complementary to almost any commercial or industrial building. The CF Fluted Wall Panel is the recommended profile for the exterior of cold storage buildings.

EXTERIOR COLORS

Eight standard colors in full strength fluoropolymer PVF²:

- Polar White
- Regal Gray
- Aegean Blue
- Sandstone
- Desert Beige
- Sculpture Bronze*
- Forest Green*
- Brick Red*

*Sculpture Bronze, Brick Red and Forest Green are not recommended for exterior color on cooler and freezer buildings.

A new expanded palette of premium colors is also available for non-cold storage buildings.

NOTE: Prices may vary by color, gauge and quantity of metal. Interior color and coating is USDA compliant Igloo White polyester.
