

**TUFF-WALL®  
INSULATED  
WALL PANEL**

Metl-Span's new **Tuff-Wall®** is an exceptionally attractive stucco-like insulated wall panel that provides the masonry look that many designers and communities desire. The exterior stucco-like surface of the panel is a hard aggregated fiber reinforced polymer coating

created with the factory applied Tuff-Cote™ finish system. Tuff-Cote™ finish offers an extremely durable; impact and abrasion resistant coating that withstands severe weather conditions.

Unlike field-applied finishes that are vulnerable to damp or cold weather during installation, Tuff-Wall® panels can be erected in virtually any weather condition. The interior face of the Tuff-Wall® panel is finished with an attractive Mesa profile and painted with a white polyester coating. As an added value, Tuff-Wall® panels function as the finished interior walls in many applications.

**MEDIUM BEIGE**

**LIGHT STONE**

**LIGHT GRAY**

**STUCCO WHITE**

**TUFF-WALL® FEATURES**

- The masonry look of stucco with the efficiency of an insulated metal panel.
- The field-tested and proven Tuff-Cote™ technology
- A durable finish that is highly resistant to impact and abrasion
- A 10-year limited warranty
